## ncaa line changes 2021

contact us at [pratersflooring.com](http://pratersflooring.com)

### what is changing

The NCAA has announced that the women's 3 point line will be discontinued, and the women's teams will use the men's 3 point line moving forward.

The men's line currently sits at the international distance of 22 feet, 1 and 3/4 inches.

This change will take effect in the 2021-2022 basketball season.

### how we help

There are a few options of how to proceed with the upcoming line changes:

- Option 1: Remove the line completely. The floor needs to be fully sanded and re-painted to completely remove the women's 3 point line.
- Option 2: Temporarily paint the women's 3 point line a tan color to match the rest of the court. This could be done until the court needs a fresh sand down the line.
- Option 3: Remove the women's 3 point line through an abrade and recoat. This is only an option if your court is within one year of a sand and has not been recoated.  
\*\*This option is case-by-case and requires an in-person consultation from a Praters representative.
